

Small Office Networks - Internet connected

EXAMPLE 1

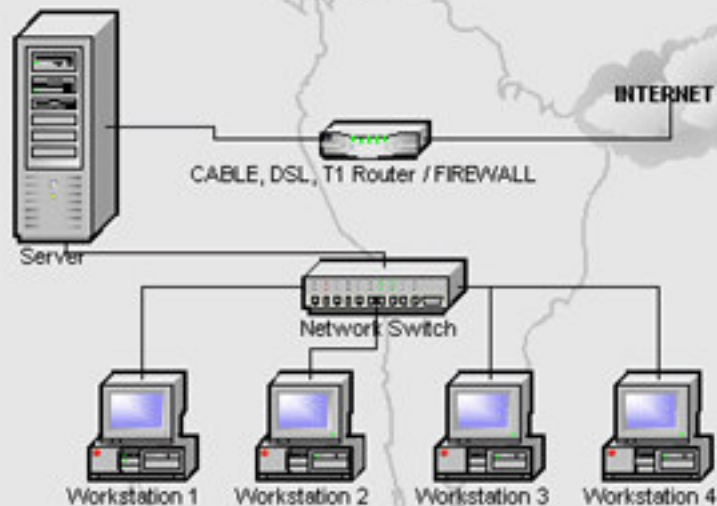

PEER TO PEER NETWORK

Least effective for business networks. Difficult to share files and maintain security without a dedicated server

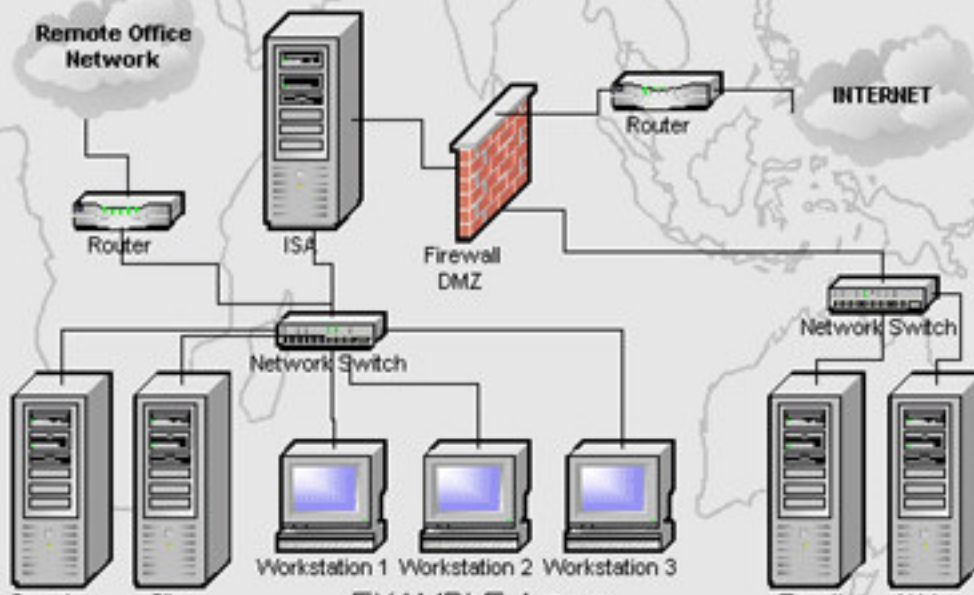

EXAMPLE 2 (Good)

CLIENT / SERVER NETWORK WITH FIREWALL

EXAMPLE 3 (Better)

CLIENT / SERVER NETWORK WITH USING THE SERVER AS AN ADDITIONAL FIREWALL Providing additional security protection from internet attacks

EXAMPLE 4 (Best)

SMALL CORPORATE NETWORK WITH SEPERATE EMAIL, WEB, FILESERVER, DOMAIN CONTROLLER, AND INTERNET SECURITY AND ACCELERATION SERVER (ISA) . DMZ firewall separates email and web server from the rest of the network for security
